

ZEOTEC

ZEOTEC 3301

- GENERAL DESCRIPTION:** ZEOTEC 3301 is a liquid condensate corrosion inhibitor of the volatile amine type.
- RECOMMENDED USE:** ZEOTEC 3301 is recommended for prevention of corrosion in steam condensate lines.
- TECHNICAL SPECIFICATIONS:**
- Specific Gravity..... 0.99
 - Flash Point..... None
 - Freeze Point..... 25 Degrees F
(-4 Degrees C)
 - pH of 1% Solution..... 11.3
 - Solubility..... Miscible in water in all proportions
 - Temperature Stability..... 300 Degrees F Max
(150 Degrees C Max)
- HANDLING & STORAGE:** Do not take internally. Handle same as any strong alkali. Avoid breathing excessive amount of fumes. Avoid eye and skin contact; wear goggles and gloves. If eye or skin contact, flush with plenty of water and seek medical attention.
- DOSAGE & CONTROL:** ZEOTEC 3301 should be fed sufficient to maintain condensate pH at 8.0 minimum to 8.5 maximum at all times.
- PACKAGING:** ZEOTEC 3301 is available in 20 L / 5 USG plastic pails
- PRICING:** Contact Zeotec Limited
